

Grant Portfolio Management Dashboard

Illustrative grant portfolio management dashboard built in Excel as a self-directed project.

Objective

This project simulates the monitoring of a small philanthropic grant portfolio. It was built to practice and demonstrate common grant management tasks such as tracking budgets, monitoring disbursements, following reporting timelines, reviewing grant risks, and preparing portfolio-level summaries. All data used in the workbook is illustrative.

Data

The workbook uses a fictional portfolio of five air quality grants. Grant names, partner types, budgets, dates, and financial figures were created for demonstration purposes only and do not represent any real organisation or funding programme.

Workbook Contents

Executive Summary: Provides a short portfolio overview with automatically updated headline figures.

Dashboard: Displays key portfolio indicators, budget utilisation, grant status, risk distribution, reporting deadlines, and overall grant health.

Grant Tracker: Tracks grant budgets, disbursements, utilisation, reporting dates, implementation status, and a simple health score for each grant.

Finance & Deliverables: Records payment requests, approvals, invoices, and progress against planned deliverables.

Skills Demonstrated

- Budget and disbursement tracking
- Portfolio reporting
- Grant monitoring
- Variance analysis

- Dashboard development in Excel
- Formula-based automation
- Conditional formatting and data validation

Notes

The workbook focuses on the monitoring and reporting stage of grant management. It does not cover activities such as proposal review, due diligence, contracting, procurement, or grant selection.

Prepared by Aditi Mishra as an independent portfolio project.
